PROFESSIONAL SUMMARY

Software Engineer withexperienceinbackend development, API automation, enterprise application migration, and business-system development. Experienced in Laravel/PHP microservices, metadata-driven API generation, and database-driven automation workflows. Contributed 500+ commits at AutomatedPros and helped build three platforms supporting API microservices project automation. Previously migrated a legacy ERP application from J2EE on WebLogic 8.1 to Java Spring Boot on WebLogic 12c and upgraded Microsoft SQL Server from 2000 to 2017. Also experienced in software quality assurance and test automation.

TECHNICAL SKILLS

Programming:PHP,Java,JavaScript, TypeScript, Python

Backend: Laravel, CodeIgniter, Java Spring Boot, REST APIs, Microservices, API Automation, Cron Jobs, Scheduler Automation

Databases: MongoDB, MySQL, PostgreSQL, Microsoft SQL Server

Infrastructure & Tools: Docker, Redis, Git, WebLogic, CI/CD Pipelines

Web & Integrations: HTML, CSS, Tailwind CSS, Bootstrap, React.js, WordPress, Elementor, Midtrans, Telegram Bot

Quality & Security: Selenium WebDriver, Selenium IDE, JUnit, Maven, Gherkin, OWASP WSTG, OWASP ZAP, Burp Suite, Kali Linux

PROFESSIONAL EXPERIENCE

AutomatedProsInc. | Backend Automation

2025–2026 | Dubai,United Arab Emirates

- Contributed 500+ commits to backendautomation development.
- Worked with the team to build three platforms supporting API microservices project automation.
- Developed PMS Ticket Automation workflows that import primary endpoints from database schemas and secondary endpoints from Figma API definitions, then map them to generate dynamic backends.
- Developed Service Provider components to support API microservices, including integrations with ElevenLabs for AI audio and OpenAI/GPT for image generation.
- Built and maintained metadata-driven API automation using Laravel microservices, including automated API and project-management ticket generation from database schemas and Figma designs.
- Developed schedulers and cron jobs supporting API generation workflows.
- Technology stack: PHP 8.4, Laravel, MongoDB, MySQL, Redis, Docker.

PT SCI (PT Selalu Cinta Indonesia) | Software Developer, System Innovation

2025 | Salatiga,Indonesia

- Migrated the 3E ERPapplication from a legacy J2EE-based core running on WebLogic 8.1 to Java Spring Boot running on WebLogic 12c.
- Migrated the ERP database from Microsoft SQL Server 2000 to Microsoft SQL Server 2017.
- Developed and maintained manufacturing business applications, including ERP, CRM, SCM, and related systems.
- Contributed to software innovation intended to improve production and management processes.

Formulatrix | Software Quality Assurance Engineer

2023–2025 | Salatiga,Indonesia

- Created more than1,000manual test cases for software testing and validation.
- Developed 500+ automated test cases based on manual test cases, covering happy-path scenarios.
- Created and managed test cases and testing guidelines using TestLink.
- Developed automated tests using Selenium WebDriver and Selenium IDE.
- Used Java, JUnit, and Maven to implement automated software tests.
- Worked with CI/CD pipelines and used Gherkin to describe requirements and testing scenarios.
- Used OpenProject to support project planning and team coordination.

PT Sabar Subur Jaya Sentosa | Software Developer and IT Manager

2019–2022 | Kudus,Indonesia

- Coordinated ITactivities and staff supporting development of an online bus ticket reservation system.
- Developed online bus ticket booking functionality with Midtrans payment gateway integration.
- Integrated a Telegram Bot using PHP and Node.js.
- Worked with third-party travel booking platforms, including Traveloka and RedBus.
- Conducted web application security testing using OWASP Web Security Testing Guide (WSTG), OWASP ZAP, Burp Suite, and Kali Linux.

SELECTED PROJECTS

Online Bus Ticket ReservationSystem | https://ssjs.awmorecreative.com

Developed online ticket reservation functionality with Midtrans payment gateway and Telegram Bot integration using PHP, JavaScript, AJAX, HTML, and Tailwind CSS.

Medical Record Digitalization | https://sistemalihrm.awmorecreative.com

Developed a web application using Laravel, PHP, and Tailwind CSS.

Online Academy and Course Platform | https://academy.awmorecreative.com

Built an online learning platform using Moodle and custom PHP.

Leaf Disease Segmentation

Built a web demonstration using Python, Streamlit, DeepLabV3, and U-Net.

Company Profile and E-commerce Website | https://nusa-pro.id

Built a WordPress and Elementor website with WooCommerce functionality.

EDUCATION

Jember University — Bachelor's Degree in Information Systems | 2023

Tunas Harapan Telecommunications Vocational High School — Software Engineering | 2019

CERTIFICATIONS

- Computer Operationand Tools — National Professional Certification Institute, Indonesia (2019)
- Software Development — National Professional Certification Institute, Indonesia (2019)
